

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

MGTS IDAD Refined Growth Fund A Acc (GB00BN7JHC19)

The Sub-fund is managed by Margetts Fund Management Limited.

Objective and Investment Policy

Investment Objective

The objective of the MGTS IDAD Refined Growth Sub-fund is to provide Capital Growth over any 5-year period.

How will the objective be achieved?

The Sub-fund will provide a minimum allocation of at least 50% to structured products, however it is expected that it will normally be more than 80%.

Structured products are a type of debt asset that provides investment returns based on the returns of other assets, for example recognised indices such as the FTSE 100 or S&P 500. The fund refines growth by combining some of the qualities of shares (such as the higher potential for growth), with some of the qualities of debt assets (such as defined payments and maturity dates).

The Sub-fund may invest (maximum of 50% of its value) into instruments which are not structured products, for example other transferable securities, such as shares, bonds, near cash instruments, investment trusts, real estate investment trusts (REITs), and collective investment schemes (which may include schemes operated by the ACD, associates or controllers of the ACD). No more than 10% of the value can be invested in collective investment schemes, including exchange traded funds.

The Sub-fund will be fully invested save for a cash amount to enable ready settlement of liabilities (including redemption of shares) and efficient management of the Sub-fund both generally and in relation to its objective. This amount will vary depending upon prevailing circumstances and although it would normally not exceed 10% of the total value of the Sub-fund, it may be up to 30% when the Investment Manager considers stock markets around the world to be overpriced or that a period of instability exists which presents unusual risks.

Management Style

The Sub-fund is actively managed, meaning that the manager selects investments, rather than tracking a stock exchange or index.

Derivative Use

The use of derivatives and/or hedging transactions are permitted in connection with investment purposes and efficient portfolio management (EPM - managing the Sub-fund in a way that is designed to reduce risk or cost and/or generate extra income or growth or both). The scheme may hold assets which embed derivatives that are used for investment purposes and efficient portfolio management.

General

Shares in the Sub-fund can be bought and sold daily (every Business Day of the Sub-fund). If you invest in income shares, income from investments in the Sub-fund will be paid out to you. If you invest in accumulation shares, income will be retained in the value of your shares.

Recommendation: this Sub-fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The risk and reward score is not guaranteed and may change over time. The lowest category does not mean risk free.

The Sub-fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Sub-fund rises and falls). The risk and reward score is based on past performance and calculated in accordance with European legislation. It may not be a reliable indication of the future risk profile.

The following risk factors are relevant to the overall risk profile of the Sub-fund. A full description of risk warnings is provided in the prospectus, which is available on our website, or by requesting a copy.

There may be a significant exposure to cash or money markets. If investment markets generally rose during this period, against expectation, then returns would be reduced.

The investment strategy focusses on securities issued by or representing a small number of issuers. This may increase risk as

performance depends on a small number of issuers, leading to higher levels of price fluctuations.

Exposure to various asset classes may include some assets that are considered to carry more risk. This means that the rise and fall in value could be greater than for lower risk investments, or that they may take longer to sell. In addition, the way in which these assets interact with each other may change through time causing higher or lower fluctuations of value.

Exposure to currencies other than the base currency is subject to currency fluctuations which could add to the rise and fall in value of investments.

Structured products may have features that alter the returns from an underlying basket of assets (typically equity indices – e.g. FTSE 100), with the objective of delivering returns within a defined range as a result of foregoing higher growth and protecting from falls in value. It is important that investors are aware that at times this range may not be achieved, in which case the structure may provide a loss that will be similar to investing directly in the underlying asset. The value may also be affected by the issuer credit rating and they may be less liquid than other investments.

The objective, policy and strategy set out above should align with the objectives of the investors and their minimum timeframe for investment.

Charges

The charges you pay are used to pay the costs of running the Sub-fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	0.00%
Exit Charge	0.00%

Charges taken from the Sub-fund over a year	
Ongoing Charges	0.95%
Performance Fee	0.00%

The entry and exit charges shown are the maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

The ongoing charges figure is based on the last year's expenses (or reasonable estimate where Sub-fund has not been operating for a full calendar year), for the year to 31 Dec 2025 and this figure may vary, year to year. It excludes portfolio transaction costs.

For further details on the calculation of the charges please refer to the Sub-fund's prospectus.

Past Performance

Past performance is not a reliable guide to future performance.

The past performance shown here takes account of all charges and costs except entry and exit charges and it is inclusive of net reinvested income.

The Sub-fund was launched on 23 Aug 2021.

The share class was launched on 23 Aug 2021.

The performance is calculated in pounds sterling.
